

8 Not sure how to format

8.1 How it currently is

As feedback I got the following on my related work chapter sections: “One subsection per paper is likely too much, seeing that you will have several papers to discuss. You can use `\paragraph{}` to highlight where you start discussing a new paper.” So these are options on how to start a new topic using the suggestion.

With an empty paragraph. I don't like the spacing in front. Latex has this as the default and I turned it off. So oen option to do this here as well. Some padding: Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna.

Keyword of section With keyword in paragraph this gives the hint, that this is the new thing. The spacing after the keyword is wierd. Yet this gives the paragraph a mini subject line without being a full subject line. I think of this like the old books where there is a big fancy letter in the front starting the tale.

Keyword of section With italic keyword in paragraph. Highlight this even more but now the spacing after the keyword is not as wierd as before because it is obvious that this is intentional. Not sure if this is going back to the previous idea.

No paragraph to compare the formatting. Some padding: Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae,
